»Hör de djupa ljud från Nordens
Barndornsdagars Baldershage.
Kämpeluren, Heimdallshornet,
Silfverharpans klang hos Brage!
Hör, det är den vaggsång nornan
Fordom kvad för folkets öra,
Och ett nordiskt ungdomslynne
Ännu glädes af att höra!

Preface to the Electronic Edition

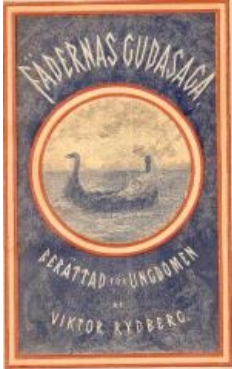

Viktor Rydberg (1828-1895) was one of Sweden's most important authors in the 19th century, between Almqvist and Strindberg. This volume, containing four works relating to old religions, is number XII of fourteen in *Skrifter av Viktor Rydberg* ("collected works"), which appeared in the decades following the author's death, edited by **Karl Warburg** (1852-1918). This collection was sold in numerous editions, and other, smaller collections with similar names were also sold. Find an overview in our presentation of this Nordic Author.

The 3rd edition, printed in 1906, was used as a copy.

The 590 pages are presented in facsimile in 150 dpi grayscale, combined with unprocessed, "raw" text from optical character recognition (OCR).

The digitized copy is not illustrated. The following are grayscale scans of Swedish painter **John Bauer's** illustrations to another edition.
